

Distribution Technology Group (DTG) and epaCUBE, Inc. partner to bring Gross Profit Optimization to the Distribution Market

DALLAS, Texas, March 10, 2009– epaCUBE, an innovative provider of product data quality and gross profit optimization solutions announced that Distribution Technology Group – (DTG) will be a reseller of epaCUBE and add its products to their solution mix for mid market distribution.

DTG will offer epaCUBE's solutions to clean and analyze product data as an on-going practice to provide their internal systems with clean, accurate, and up-to-date product information. epaCUBE will synchronize and collaborate with all points of our client's business. In addition, the epaCUBE Margin Manager Module is licensed for gross profit analysis and optimization! Margin Manager is a price and margin modeling system that quantifies the impact on gross margin of any changes that affect product costing and pricing.

"We are excited to be working with Distribution Technology Group, one of the most customer oriented companies in the distribution marketplace." stated Randy Hughes, VP of Sales & Marketing for epaCUBE. We look forward to working with DTG as they increase their client's service level and reduce costs by improving product data and modeling gross margin strategies.

Stacey Pandeloglou states "We chose epaCUBE's product data management and price modeling suite as part of DTG's overall strategy to offer our clients solutions that leverage their existing technology. Stacey continued "Product Data Quality is a cornerstone of operational success for DTG clients and epaCUBE will take our clients to the next level in automating all aspects of their business related to product data quality."

About Distribution Technology Group

Distribution Technology Group was founded to provide "Best-of-Breed" distribution centric technology solutions to the distribution industry. DTG is committed to offering personalized solutions that maintain the distributor's natural business flow as well as protect their existing technology investments. Stacey has provided technology solutions to distributors for over three decades during his distinguished career with Trade Service Systems (now Activant), RouteView, ESC and other distribution-centric technology providers.

About epaCUBE, Inc.

epaCUBE was founded on the premise that "real dollars" could be reclaimed in the supply chain by solving the problems and overcoming the challenges associated with optimizing "gross margin" over "continuously" cleansed and up-to-date product data. The Product Data Management and Gross Profit Optimization tools give a company the powerful ability to manage every aspect of its product mix, specifically and accurately target its customers and their consumers, and negotiate with suppliers from a position of strength based upon complete knowledge of its products. epaCUBE enables companies to easily manage product information across existing business processes and systems. It is a powerful solution that improves data quality, dramatically increases productivity, and streamlines integration with internal systems and outside trading partners.

High performance companies thrive from this type of product knowledge, and epaCUBE's goal is to make this level of product information available to the distribution market in a packaged, affordable solution.
